Dear Hiring Manager,

I am applying for an entry-level opportunity in your organization. As a recent Computer Science Engineering graduate, I have a strong foundation in programming, problem-solving, and software development principles, along with a strong willingness to learn and adapt.

I am eager to contribute to team objectives, support technology-driven initiatives, and grow professionally in a fast-paced environment. I would welcome the opportunity to discuss how my skills align with your requirements.

Sincerely,

Poornashree L

Objective

Computer Science Engineering graduate with expertise in software development, AI-based systems, and analytical problem solving. Passionate about driving innovation, operational efficiency, and digital transformation through cutting-edge technologies.

Experience

- AWS APAC Solutions Architecture, Forage - AWS** May 2025 - May 2025
Intern
Designed Scalable Hosting Architecture With Cost Estimation.
- Pinnacle Labs** April 2025 - May 2025
Web Development Intern
Developed 3 responsive websites using HTML , CSS , and JavaScript.
Gained hands-on experience.
- Forage - TATA** February 2024 - July 2024
Cybersecurity Analyst Job Simulation
Simulation IAM Solutions and created detailed documentation.

Education

- Cauvery Institute Of Technology** 2026
Bachelor Of Engineering (CSE)
8.5
- Mahesh PU College** 2022
Higher Secondary Education (PCMB)
64
- Karnataka Public School** 2019
High School (CBSE)
72

Skills

- Python
- Java
- Web Development
- Artificial Intelligence
- Cybersecurity

Projects

- AI-Driven Medical Voice Bot with Real Doctor Consultation for Enhanced Healthcare Communication**
An AI-driven medical voice bot with real doctor consultation streamlines healthcare communication by acting as an intelligent first point of contact for patients. Using advanced voice recognition and natural language processing, the system captures symptoms, performs preliminary triage, and assesses urgency before seamlessly escalating complex cases to

licensed doctors for live consultation. This hybrid approach optimizes clinical workflows, enhances patient experience through faster and more accessible care, and enables doctors to make informed decisions with AI-generated insights. Overall, it delivers a scalable, efficient, and future-ready healthcare communication model that bridges automation with human expertise.

- **3D Solar System**

Built a solar system simulation with 2D/3D views and planet data using HTML, CSS, and JavaScript. With the goal of offering an engaging, educational tool for students through realistic visualization.
